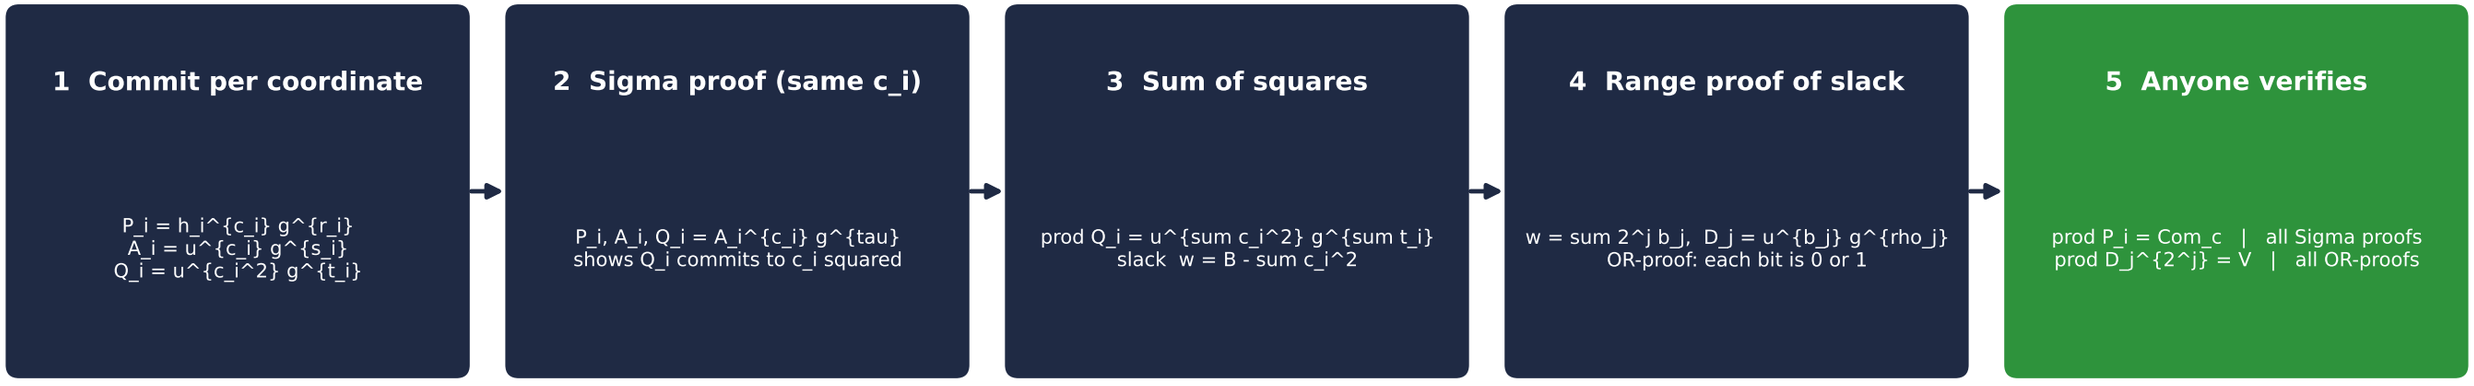
Zero-knowledge proof that a committed update has L2 norm <= C



Result: sum c_i^2 = B - w <= B (soundness: discrete log; zero knowledge: honest-verifier, Fiat-Shamir)

14 parameters	256 parameters	Effect	Limit
0.32 s prove, 0.30 s verify, 17 KB	2.9 s prove, 2.4 s verify, 146 KB	poisoner caught in round 0 with audits at 0%	linear cost: ~19 s/hospital/round at 1,665 parameters
